

Our customers are our driving force

Innovative Building and Contracting Services Inc. began operations on June 01, 1989 as Williams Construction Co. with the objective of providing excellent service at an affordable price. The primary business at that time was custom residential construction, custom remodeling and historical restoration. The business was incorporated in 1991 as Innovative Building And Contracting Services Incorporated. After incorporation it expanded its operation to include light commercial build outs and residential and commercial property maintenance.

As General Contractors we also act as a portal for many other services for our clients using sub-contractors. These services include but are not limited to [plumbing](#), [electrical](#), [mechanical](#), [roofing](#), [geothermal drilling](#) and [grounds maintenance](#).
